

# Project Update

---

The project is proceeding ahead of schedule, with westbound ramps estimated to open in mid-to-late May. The contractor, K&E Excavating, Inc., and its subcontractors have worked diligently to minimize the disruption to the community and complete the current stage of the project sooner than estimated.

Drivers should look for roadside signs with more information about upcoming traffic changes, including the switch to the westbound section of the highway.

A new temporary connection for the eastbound off-ramp will also be open. Crews will begin replacing eastbound bridges and will widen Cascade Highway beneath the overpass.

Please note that shortly after traffic is switched, Cascade Highway will be closed for one to two days for eastbound bridge demolition. Follow signs to detour routes. Eastbound traffic should use the on-ramps at Fernridge Road or Golf Club Road while contractors work on the new eastbound ramps.

A diagram is included on the other side of this flyer, and all of this information is available on the project Web site, [www.sublimityinterchange.com](http://www.sublimityinterchange.com). You can also sign up to receive ODOT's news releases via email, including weekly construction updates.

Please contact us with any questions, concerns or comments about the project.

## **OR22 @ SUBLIMITY INTERCHANGE STAGE 3 (Late Spring 2009 Construction)**

- ① All traffic moves to the west bound highway.
- ② West bound ramps are open to traffic.
- ③ New east bound on-ramp is not yet open.
- ④ Temporary east bound off-ramp is open.
- ⑤ Replace east bound bridges.
- ⑥ Widen east side of Cascade Highway beneath bridge.
- ⑦ Existing east bound on ramp closes.

Use Fernridge Rd. and Golf Club Rd. Interchanges  
to access eastbound OR 22

Please drive safely, and expect minor delays,  
as materials and equipment are  
moved through the site.
